Self-directed Neuro-plasticity:
An Integrative Approach to
Rewire the Brain

OCEAN VIEW ROOM
Advanced Reservation Required

Learn a new way of thinking about the work we do and how the latest research in neuroscience backs up what we've known intuitively for ages. You will not only learn about some of the current research in neuro-plasticity, you will get some practical ways to apply all this with your clients. Join me to learn a simple way of using pattern interrupts and self-hypnosis to set up a recursive system of generative change.

My goal is for you to leave this luncheon full of ideas, techniques, connections and smiles.
